

ABSTRACT OF THE DISCLOSURE

A photo-frame photo album generally includes a lower frame, a lower divider, an upper frame and an upper divider. Wherein the upper divider is disposed on the upper frame, such that rather big sized photos
5 can be received in the space between the upper frame the upper divider; both the lower and the upper frames are provided with magnetic pieces so as to prolong the service life of the photo album; on inner sides of the upper and the lower dividers of the upper and the lower frames are respectively provided with stop pieces and further formed with slits. Such
10 that photos in different sizes can be received in the inner sides of the upper and the lower dividers; on the side frames of the lower and the upper frames are formed with arresting faces, they are matched to each other, which enable the upper frame to stand with respect to the lower frame, so as to show the photo on the upper divider; both on a support
15 stand which disposed on outer side of the lower divider of the lower frame and in the same location of the receiving groove are respectively provided with magnetic pieces, and thus the service life of the support stand is prolonged.
